Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office action is responsive to amendment filed 04/24/08.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 19, the limitation “the operation member drive control means drives the operation member so as the apply a force in a direction opposite to the direction in which the operation member is moved” was not to particularly point out in the specification.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 18, and 20-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Badarneh (Pub. No.: US 20040233159).

Regarding claim 1, Badarneh teaches a user interface device (fig. 42), comprising:

a display screen (782) for displaying an [0125];

display control means (776) for controlling so as to display an image on the display screen (782) [0125];

an operation member (770-770'') for being operated by a user [0125]; and operation member drive control means (includes driving section 502 and 504 for the operation member 501, figs. 27a and 27b, control section 776 and position detection 774, fig. 42) for driving the operation member (i.e., 501, fig. 27a) at least in a one-dimensional direction [0107],

wherein the operation member drive control means drives the operation member (i.e., 770-770'') by moving the operation member in a direction (X/Y) in which an image (792) is displayed on the display screen in order that the user selects the displayed image using the operation member [0125].

Regarding claim 18, Badarneh teaches the operation member drive control means drives the operation member according to an operation pattern which corresponds to the image displayed on the display screen [0125].

Regarding claim 20, Badarneh teaches the operation member drive control means moves the image in the direction in which the operation member is moved [0125].

Regarding claim 21, Badarneh teaches the operation member driver control means drives the operation member when the user confirms selection [0107 and 0125].
